## EDUCATION

---

### Queens College

*Graduating December 2025*

BA Computer Science

### Queens Borough Community College

A.S in Engineering sciences

**Relevant Coursework:** Algorithmic Problem Solving in C++, Object-Oriented Programming (C++ & Java), Data Structures, Discrete Structures, Computer Organization & Assembly Language, Computer Architecture, Calculus I–III, Linear Algebra, Differential Equations, Electrical Circuits

## SKILLS

---

**Languages:** Python, Java, C++, C, SQL, HTML, Mips Assembly

**Frameworks & Libraries:** React, Git, MySQL

## EXPERIENCE

---

### Purple Dragon International Dojo Instructor

**July 2019 - current**

#### Dojo Instructor

*Queens, New York*

- Delivered structured, performance-focused instruction to students ages 5–50, fostering discipline, persistence, and teamwork
- Adapted teaching methods to meet diverse cognitive and learning styles, building interpersonal and communication skills
- Developed and managed class schedules, applying organization and time management in a fast-paced environment

### Private tutor

**November 2022 - current**

#### Self-employed

*New York, New York*

- Provided personalized instruction in mathematics, science, and programming (Xojo), reinforcing analytical and algorithmic thinking.
- Taught foundational concepts in software development and logic, including loops, conditionals, and data structures
- Adapted complex technical content to individual learners, demonstrating strong communication, mentoring, and problem-solving skills

### Badal Enterprises LLC

**August 2021 – July 2024**

#### Multi-Skilled Construction Worker (project basis)

*New York, New York*

- Applied precise calculations and measurements—key competencies for systems design and hardware integration
- Resolved technical challenges in real time using analytical reasoning and process-driven problem solving
- Executed detailed construction plans, showcasing attention to detail and the ability to follow technical specifications

## PROJECTS

---

### Diabetes Prediction System | C++, Custom Random Forest, OOP, Layered Arch

- Collaborated with a team of three to build a C++ application using a custom Random Forest classifier for diabetes prediction
- Designed the layered system (UI, Prediction, Data), achieved 100% accuracy on baseline data, and implemented input customization, CSV support, and full unit/system testing

### CHAD Query Submission System – Java, MySQL, Maven

- Designed and implemented a menu-driven Java application for structured SQL query submission across three user roles
- Created and configured a remote MySQL database using AWS RDS; built schema, managed secure JDBC connections, and tested real-time query interaction

## CERTIFICATES

Foundations of Cybersecurity (Coursera), Manage Security Risk (Coursera), Connect and Protect: Networks and Network Security (Coursera), Lifeguard and CPR (Red Cross)
