EDUCATION

Queens College, CUNY — Queens, NY

Graduated Summer 2026

B.A. in Computer Science

Queens Borough Community College — Queens, NY

A.S. in Engineering Science

Relevant Coursework: Data Structures & Algorithms, Object-Oriented Programming (C++/Java), Web Application Development (Node.js/Express/MongoDB), Computer Architecture, Discrete Structures, Database Systems

TECHNICAL SKILLS

Languages: Python, Java, C++, C, JavaScript, SQL, HTML/CSS, MIPS Assembly

Frameworks & Libraries: Node.js, Express.js, EJS, React, MongoDB, MySQL

Tools & Platforms: Git/GitHub, Render, AWS RDS, OAuth 2.0, REST API Design

APIs & AI Integration: Groq API, OpenAI API, OpenWeather API

PROJECTS

[AI Meal & Fitness Planner](#)

Node.js, Express, EJS, MongoDB, Groq API — Deployed on Render

- Built and deployed a full-stack web app that generates personalized meal and fitness plans using the Groq LLM API (llama-3.3-70b-versatile)
- Implemented session-based authentication with connect-mongo, full CRUD plan management, and a user profile collection for personalization
- Parsed structured JSON responses from the LLM API to dynamically render personalized meal and fitness plan cards in the UI

Multi-AI Collaboration Tool

React, OpenAI API

- Built a React application enabling structured, three-phase collaboration between Claude and ChatGPT via direct OpenAI API integration
- Designed a multi-agent workflow for iterative idea refinement, demonstrating API orchestration and front-end state management

[Diabetes Prediction System](#)

C++, Custom Random Forest, Object-Oriented Design

- Collaborated with a team of three to design a layered C++ application (UI, prediction, data) using a custom-built Random Forest classifier
- Achieved 100% accuracy on baseline data; implemented CSV input support and full unit/system testing

CHAD Query Submission System

Java, MySQL, AWS RDS, Maven

- Designed a menu-driven Java application enabling structured SQL query submission across three user roles
- Configured and managed a remote MySQL database on AWS RDS, including schema design and secure JDBC connections

RESEARCH EXPERIENCE

Undergraduate Research Assistant — Queens College, CUNY

Bayesian Optimization for Dynamic Mobile Observer Coverage | Advisor: Prof. Bon Sy

- Developed a Bayesian Optimization pipeline in Python with explicit Gaussian Process and Expected Improvement components to optimize mobile observer coverage strategies
- Evaluated the approach against real-world spatial datasets (NYC Taxi, Seattle 911, T-Drive Beijing) and presented findings to faculty

EXPERIENCE

Dojo Instructor — Purple Dragon International Dojo *July 2019 - Present*

Queens, New York

- Delivered structured, performance-focused instruction to students ages 5-50, fostering discipline, persistence, and teamwork
- Adapted teaching methods to diverse cognitive and learning styles, building strong interpersonal and communication skills
- Developed and managed class schedules, applying organization and time management in a fast-paced environment

Private Tutor — Self-Employed

November 2022 - Present

New York, New York

- Provided personalized instruction in mathematics, science, and programming, reinforcing analytical and algorithmic thinking
- Taught foundational software development concepts including loops, conditionals, and data structures

Construction Worker — Badal Enterprises LLC

Aug 2021 - Jul 2024

New York, New York

- Applied precise calculations and measurements—key competencies for systems design and hardware integration
- Resolved technical challenges in real time using analytical reasoning and process-driven problem solving

CERTIFICATIONS

Google / Coursera: Foundations of Cybersecurity; Manage Security Risk; Connect and Protect: Networks and Network Security

American Red Cross: Lifeguard and CPR
